## EDUCATION

---

### Rochester Institute of Technology

*August 2011 - May 2016*

**Ph.D.**, Chester F. Carlson Center for Imaging Science

**Thesis Topic:** Aerial visual vehicle detection and tracking using an adaptive, multi-modal sensor.

**Advisor:** Matthew J. Hoffman, Ph.D.

**Co-Advisor:** Anthony Vodacek, Ph.D.

### University of Bridgeport

*August 2009 - May 2011*

**M.S.**, Department of Electrical Engineering

**Thesis Topic:** Environmental non-speech sound classification with a new set of time-domain features.

**Advisor:** Buket D. Barkana, Ph.D.

### Eskisehir Osmangazi University

*September 2004 - May 2009*

**B.S.**, Department of Electrical and Electronics Engineering

**Thesis Topic:** Autonomous parallel parking of non-holonomic vehicles

**Advisor:** Osman Parlaktuna, Ph.D.

## WORK EXPERIENCE

---

### Postdoctoral Fellow

*July 2018 -*

Computer Science, Stanford University, Stanford CA

**Advisor :** Stefano Ermon, Ph.D.

### Computer Vision Engineer

*June 2017 - July 2018*

Planet Labs, San Francisco, CA

Worked on object detection in satellite images using convolutional object detectors and built a large-scale object detection dataset using satellite images, and conducted research to tackle small object detection in low resolution satellite images.

### Computer Vision Engineer

*August 2016 - June 2017*

Autel Robotics, San Ramon, CA

**Manager :** Youngwoo Seo, Ph.D.

Worked on a long-term target following system that will be deployed in the next generation drones. This work involves designing an online learning method to track a single object from a monocular camera at real-time on a low-end embedded platform. Other part of my work includes implementing and testing the tracking algorithm on the embedded platform.

### Computer Vision Algorithm Engineer Intern

*November 2015 - May 2016*

Futurewei Technologies (Huawei R&D), Bridgewater, NJ

**Supervisor:** Dong-Qing Zhang, Ph.D.

My internship work was two-folds. First, I designed a subspace learning method to detect strangers in a family photo album using face-only and contextual features learned by fine-tuned Deep Convolutional Neural Networks. In the second step, I designed a probabilistic graph-based approach to assign semantic roles to individuals detected to be family members in the first step.

## RESEARCH EXPERIENCE

---

### Graduate Research Assistant

*April 2012 - July 2016*

Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology, NY

**Advisor:** Matthew J. Hoffman, Ph.D.

Conducted research on aerial vehicle detection and tracking inspired by an adaptive, multi-modal sensor. This work involves developing computer vision and machine learning methods to detect, associate and track ground vehicles in an aerial video. The unique challenges posed by medium-to- high altitude aerial tracking is addressed by efficient use of rich hyperspectral data acquired by an adaptive hyperspectral sensor.

**Graduate Research Assistant**

*May 2014 - June 2014*

Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology, NY

**Advisor:** Elizabeth Cherry, Ph.D.

Performed research on 3-D MRI cardiac segmentation. A probabilistic graph-based approach has been proposed to segment the full tissue volume of the heart. A distance term has been incorporated to improve segmentation at the faint boundaries of the heart in MRI slices. The full tissue volume of the heart is required to fully understand the underlying mechanics behind the ventricular fibrillation.

**Graduate Research Assistant**

*August 2009 - May 2011*

Electrical Engineering Department, University of Bridgeport, CT

**Advisor:** Buket D. Barkana, Ph.D.

Conducted research on classifying environmental sounds to classify abnormal and normal events. A new, pitch range-based features were proposed to improve the classification. On the classification end, a non-linear Support Vector Machine and Radial Basis Function Neural Network were trained to classify the test data. The results indicate that the new set of low dimensional features leads to higher accuracy rates when they are combined with the conventional Mel-Cepstrum Frequency Coefficients features.

**Graduate Research Assistant**

*January 2009 - May 2009*

Electrical and Electronics Engineering Department, Eskisehir Osmangazi University

**Advisor:** Osman Parlaktuna, Ph.D.

Conducted research on autonomous parallel parking of non-holonomic vehicles. Dimensions of a parking lot is sensed by the ultrasonic sensors mounted on a vehicle. Based on the dimensions of a parking lot, parallel parking is accomplished by a few or many repetitions of circular movements.

## TEACHING EXPERIENCE

---

**Graduate Teaching Assistant**

*January 2015 - May 2015*

Pattern Recognition, Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology

**Instructor:** John Kerekes, Ph.D.

**Graduate Teaching Assistant**

*August 2011 - May 2012*

Programming for Imaging Science, Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology

**Instructor:** Jeff Pelz, Ph.D.

**Graduate Teaching Assistant**

*August 2010 - May 2011*

Digital Image Processing, Audio Signal Processing, Speech Signal Processing

Electrical Engineering Department, University of Bridgeport

**Instructor:** Buket D. Barkana, Ph.D.

**Graduate Teaching Assistant**

*January 2009 - May 2009*

Non-linear Control Systems

Electrical and Electronics Engineering Department, Eskisehir Osmangazi University

**Instructor:** Osman Parlaktuna, Ph.D.

## PEER REVIEWS

---

IEEE Transactions on Geoscience and Remote Sensing

IEEE Transactions on Information Forensics and Security

Neural Information Processing Systems

Winter Conference on Applications of Computer Vision (WACV)

IEEE Sensors Journal

IEEE Access

IEEE Transactions on Image Processing

MDPI, Sensors

International Conference on Machine Learning

## AWARDS

---

RIT Graduate Scholarship Award

*September 2011 - May 2016*

University of Bridgeport Deans Scholarship Award

*August 2009 - May 2011*

University of Bridgeport Outstanding Student Award

*May 2011*

Fulbright Opportunity Grant

*August 2009*

Erasmus Exchange Student

*September 2007 - January 2008*

## **HARDWARE AND SOFTWARE SKILLS**

---

C/C++, Python, TensorFlow, PyTorch, Caffe, OpenCV, MATLAB, Linux Shell Scripting, IDL/ENVI, LaTeX, Git, HTML

## **LANGUAGE PROFICIENCY**

---

English (Advanced), German (Beginner), Turkish (Native)
